

John M. Long, PE PG

John Long is the Director of Mining and Geology for Imerys Performance Minerals North America, where John leads the operational and technical aspects of mining, resource management and mine engineering. John is a graduate of the University of North Carolina at Wilmington, where he received a BS in geology and a BA in physics. He later graduated from the University of North Carolina at Charlotte with a masters degree in civil engineering.

After graduation, John worked in the consulting field, specializing in geology and geotechnical related project work where he gained professional licensure in Geology and Engineering. In 2004 John left consulting and entered into the mining sector with JM Huber Corporation and later Lafarge where he held various technical and operations related roles. John has worked in many ore deposits across the United States, Brazil, the Middle East and South Africa.

Through this work experience John has gained expertise in a multitude of systems and processes most notably resource estimation and mine planning.
