Who We Are

The Central Appalachian Section (CAS) is a legally constituted unit of the Society for Mining, Metallurgy & Exploration (SME), and encompasses the geographical areas of Kentucky, Virginia and West Virginia.

Our members network with their peers and hear valuable presentations through section events and professional development conferences. The section supports the activities of all the Eastern Mining Engineering Schools (University of Kentucky, Penn State, West Virginia University and Virginia Tech) as well as collaborates with neighboring SME sections, especially the Pittsburgh Section of the SME.

Due to the generosity of our sponsors, membership is free of charge; members are encouraged to also join the National SME.
